Sex-chromosome aneuploidy (male): XXY / XYY

UAR[X] vs UAR[Y] · orig reference

Decision rule

- boundary(x) = −0.0837·UAR[X] + 0.4877 (fitted to the XY reference cloud)
- UAR[Y] > boundary + 0.005 → Detected; boundary < UAR[Y] ≤ boundary + 0.005 → Suspected; otherwise Not Detected.
- Type of an abnormal call: UAR[X] ≤ 5.30 → XYY; UAR[X] > 5.30 → XXY.
